

Intern Assessment

Create a simple web page with react.js/vue.js framework and JavaScript that should be able to

- Responsive over screen size (PC, mobile, tab)
- Gets data from https://opentdb.com/api_config.php api url
- Shows a list of 20 questions and the right answer.
- Have a heart button/favorite button beside every question (doesn't need to be saved anywhere when user press it)
- Nicely aligned

Any kind of creative design will be appreciated and counted as bonus marks. You can use any other css frameworks along with react.js/vue.js website.

Upload the codebase at GitHub with instruction to run it and share the link

This assignment should be done within three days.
